

Fixed Wireless Access - June Snapshot

Over half of all LTE operators have launched a FWA service

415 operators in 166 countries/territories have launched either LTE or 5G 3GPP-compliant FWA services

As of June 2020 GSA's NTS database showed:

- There are 426 operators investing in LTE broadband fixed wireless access (FWA) services, 405 of which have launched services. (An extra 113 operators have been identified as offering mobile broadband services using MiFi devices or dongles only).
- In addition, 83 operators have been identified as investing in 5G FWA services, including 33 that have launched services and 6 that have launched limited availability

This report is compiled from data stored in the GSA Analyser for Mobile Broadband Devices/Data (GAMBoD) database.

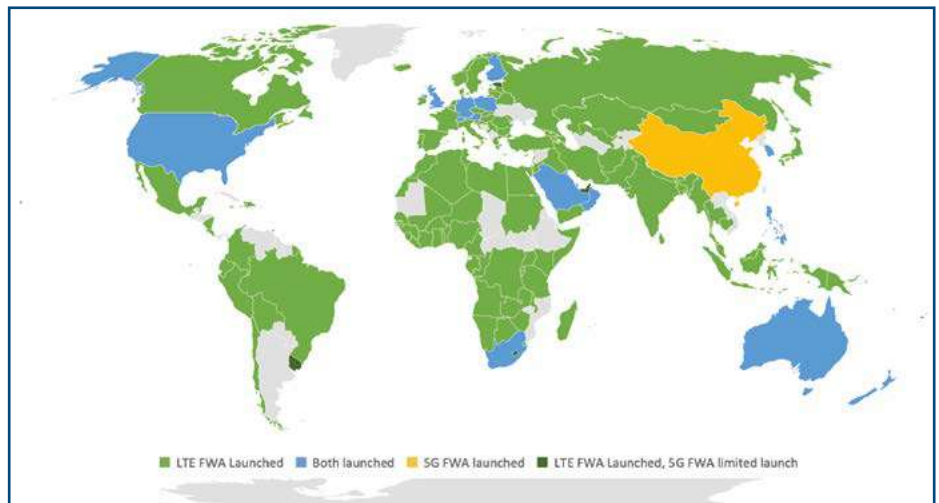

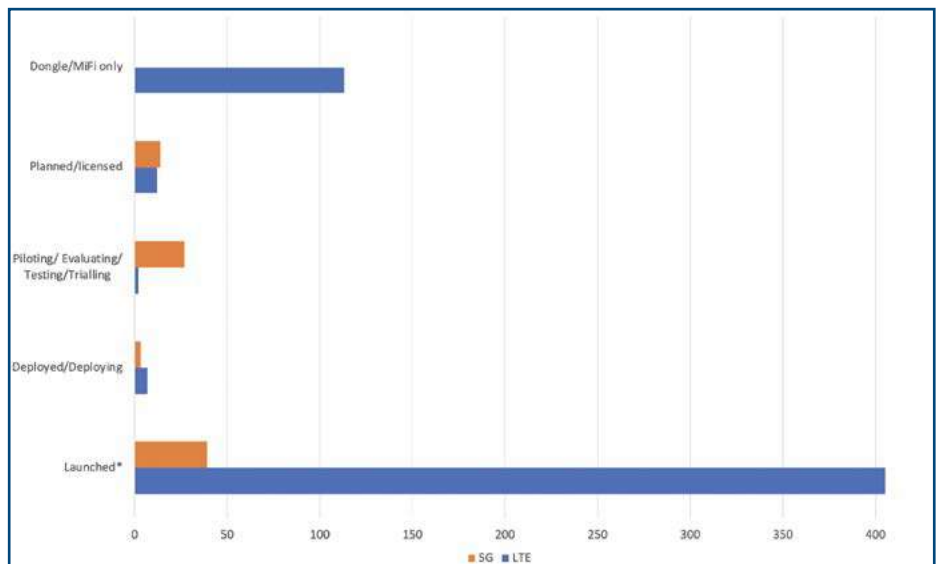

Figure 2: Count of operators investing in FWA

931 LTE FWA devices available from 88 vendors

84 announced 5G FWA devices from 53 vendors

As of June 2020 GSA's GAMBoD database showed:

- 931 available LTE fixed wireless access (FWA) devices, including indoor and outdoor CPE and enterprise grade CPE/routers/gateways from 88 vendors.
- After phones, the most prevalent category of 5G device is the FWA CPE form factor. The number of announced devices has grown reach 84 devices. Eighteen of these have been identified as commercially available.

ABOUT GSA

GSA is the voice of the global mobile ecosystem and has been representing mobile suppliers since 1998.

GSA GAMBoD Database

Reports are based on data contained in the GSA GAMBoD databases which is a resource available to GSA Members and Associates. Companies and policy makers can subscribe as a GSA Associate to the database to gain insights into the source data behind reports for their own research purposes.

Discounted annual subscription are available to regulators, government agencies and mobile operators.
