

**FOR IMMEDIATE RELEASE**

## **TOP-TIER NETWORKING SECURITY GIANT TO STANDARDIZE ON SILICOM'S MODULES**

*- Together With Modules Already Using, Sales To This Customer Are Now Expected to Reach \$4M Per Year -*

**KFAR SAVA, Israel— July 8, 2013, - Silicom Ltd. (NASDAQ and TASE: SILC)** today announced that one of the world's largest networking security companies, which for the past two years has been using Silicom's 10Gbps modules in one of its appliance product lines, has now standardized on additional Silicom's modules for both the current and an additional appliance product line. The Company expects that sales of these new wins will ramp up its revenues from this customer to approximately \$4 million per year.

The customer will now use within two of its appliance product lines a variety of modules which Silicom developed as part of its SETAC program, including both 10Gbps and 1Gbps modules with and without bypass in copper and fiber.

"We are proud that this premier networking security leader views Silicom products as strategic enablers, as evidenced by its design of an increasing range of Silicom solutions into its growing portfolio of advanced security appliances," commented Shaikha Orbach, Silicom's President and CEO. "When this customer became one of our first volume users of networking modules, we were confident that they would become volume users of additional Silicom products, and this has now come to fruition. Furthermore, the customer is currently considering working with Silicom on additional products, including intelligent solutions and additional modules. We fully expect that their use of Silicom solutions will continue to increase, representing a reliable and continuously growing driver of our revenues in the years to come."

Mr. Orbach added, "The fact that this customer's usage of products has grown and developed in line with our expectation confirms our 'read' of the market and our understanding of its true needs. This insight, more than any other advantage, continues to be the key to our success, assuring that we apply our considerable technology and agility assets to the most vexing pain points of some of the industry's largest players. We believe that this ability will enable us to continue accelerating our growth in the future."

##

## **About Silicom**

Silicom Ltd. is an industry-leading provider of high-performance networking and data infrastructure solutions. Designed primarily to increase data center efficiency, Silicom's solutions dramatically improve the throughput and availability of networking appliances and other server-based systems.

Silicom's products are used by a large and growing base of OEM customers, many of whom are market leaders, as performance-boosting solutions for their offerings in the Application Delivery, WAN Optimization, Security and other mission-critical segments within the fast-growing virtualization, cloud computing and big data markets. Silicom's product portfolio includes multi-port 1/10 Gigabit Ethernet server adapters, Intelligent Bypass solutions, Encryption accelerators and a variety of innovative Smart adapters. These products are available for incorporation directly into our OEM customers' systems, or provided as part of Silicom's patented SETAC (Server To Appliance Converter), a unique approach to the provision of high quality standard platforms with modular front connectivity.
